**JETRION LAUNCHES NEW WIDE-FORMAT SOLVENT INKS
FOR XAAR[®]-BASED PRINTERS**

**Jetrion 6500 Ink Set Provides Expanded
Color Gamut, Greater Reliability at Lower Cost**

ANN ARBOR, MI – September 11, 2005 – Jetrion LLC, a leading supplier of inkjet printers, inks and custom systems, has announced the availability of a new set of wide-format solvent inks for Xaar-based printers used in the production of outdoor products such as billboards, exterior signage, bus and building wraps.

Available in four-color, six-color and Hexachrome[®], Jetrion's 6500 true solvent inks enable improved printer performance by increasing printhead open time, reducing clogged nozzles, and reducing printhead maintenance. The NMP-free Jetrion 6500 inks also extend printhead life and print on the widest range of vinyl, synthetic and paper substrates most often used in outdoor environments.

Utilizing technology of Jetrion's earlier successful wide format ink formulas, the new solvent inks are formulated with automotive-grade pigments for exceptional lightfastness and a full two-year outdoor weather resistance. The inks also have a proven shelf life of twelve months.

MORE...

The new wide-format inks reduce overall operating costs for OEMs as well as end-users who can realize important savings in material and production time. In Jetrion's pre-launch benchmarking process with major wide-format printing companies across the country, printheads lasted significantly longer. The new wide-format inks also enabled users to print with exceptional reliability and outstanding quality on a greater variety of lower-cost media.

Dr. Ken Stack, president of Jetrion, observed, "Our new wide-format inks give printers the expanded color gamut they need to meet the challenges of reproducing the increasingly complex designs that are being created today for wide-format products. We've formulated our new inks to specifically improve printer reliability and printhead life thus providing considerable cost savings for our customers in the process."

More information about Jetrion's 6500 wide-format inks and the company's full line of solvent and UV drop-on-demand (DOD) printers and inks is available by contacting Dean Haertel at 734-622-6268 or on the Jetrion website at www.jetrion.com.

About Jetrion LLC

A wholly-owned subsidiary of Flint Ink, Jetrion LLC provides a complete spectrum of industrial inkjet products, services and custom high-performance integration solutions to the printing, converting, packaging and direct mail industries. For more information about Jetrion, contact Jason Oliver, director of marketing and new business development, at 734-622-6650 or info@jetrion.com. Jetrion is on the Web at www.jetrion.com.

About Flint Ink

Founded in 1920, Flint Ink Corporation offers a comprehensive range of flexographic, sheetfed, web offset, gravure, UV/EB curable, digital, and advanced and conductive inks. Operations are organized into eight segments: North America, Latin America, Asia, India/Pacific, Flint-Schmidt in Europe, Jetrion LLC, Precisia LLC, and CDR Pigments & Dispersions.
